WORK EXPERIENCE

Research Assistant - UVA *August 2020 – Present*
Supervised by Prof. Yonghwi Kwon

Developer Advocate - Educative, inc. *December 2019 – August 2020*

- Created Javascript course consisting of 137 lessons, 264 Coding playgrounds, and 4 projects.
- Deployed 300+ coding playgrounds and 62 coding challenges across 4 courses in Javascript, C/C++, and Python.
- Collaborated with 2 external authors to deploy their respective courses under strict deadlines.

Research Assistant - LUMS *January 2019 – June 2020*
Supervised by Prof. Fareed Zaffar

Teaching Assistant - LUMS *Spring 2018 & Fall 2019*
CS300 - Advanced Programming & CS310 - Algorithms

- Designed and automated grading infrastructure for 6 assignments for a class of 90 students.
- Created a programming exam with real-time individual student progress to test asynchronous programming in Javascript.

PROJECTS

Forced-execution of Python binaries using CPython *April 2021 – June 2021*
Research Project - UVA

- Created customized CPython interpreter to enable execution of all program flows. Achieved 100% coverage for 100 sample python binaries.
- Wrote a logging mechanism in CPython to track dataflows on run-time and to track coverage of execution.

Tracking fine-grained file changes at kernel level *October 2019 – December 2019*
Research Project - LUMS

- Wrote a **kernel-module** to hook and track sys-calls that modify annotated files.
- Created Python program to process logs to accommodate file-diffs in system provenance reducing overall log size by 95%.

Obfuscation of code by flattening of control flow of binaries *June 2019 – September 2019*
Research Project - LUMS

- Wrote **LLVM passes** that analyze and shuffles program control flow to obfuscate it.
