WORK EXPERIENCE

Research Assistant - UVA
Supervised by Prof. Yonghwi Kwon

August 2020 – Present

- Published 3 papers (CCS'21, FSE'21, and S&P'22).
- Led one project, with 2 internal and 3 external collaborators, to a first-author paper submission in S&P'23 (in Major Revision).
- Mentored one undergraduate student (intern at Amazon for Summer'22).

Developer Advocate - Educative, inc.

December 2019 – August 2020

- Created JavaScript course consisting of 137 lessons, 264 Coding playgrounds, and 4 projects.
- Deployed 300+ coding playgrounds and 62 coding challenges across 4 courses in JavaScript, C/C++, and Python.
- Collaborated with 2 external authors to deploy two courses under strict deadlines.

Research Assistant - LUMS
Supervised by Prof. Fareed Zaffar

January 2019 – June 2020

- Completed one project (accepted in NDSS'22) in collaboration with Secure & Transparent Systems Laboratory at the University of Illinois Urbana-Champaign.

Teaching Assistant - LUMS

Spring 2018 & Fall 2019

CS300 - Advanced Programming & CS310 - Algorithms

- Designed and automated grading infrastructure for 6 assignments for a class of 90 students.
- Created a programming exam with real-time individual student progress to test asynchronous programming in JavaScript.

PROJECTS

Forced-execution of Python binaries using CPython

April 2021 – June 2021

Research Project - UVA

- Customized CPython interpreter to enable execution of all program flows. Achieved 100% coverage for 100 sample python binaries.
- Crafted a logging mechanism within CPython to track dataflows and coverage on run-time.

Tracking fine-grained file changes at kernel level

October 2019 – December 2019

Research Project - LUMS

- Wrote a **kernel-module** to hook and monitor sys-calls modifying targeted files.
- Reduced overall log size from tracking file writes by 95% by crafting a Python program to process logs while accommodating file-diffs in system provenance.

Obfuscation of code by flattening of control flow of binaries

June 2019 – September 2019

Research Project - LUMS

- Made **LLVM passes** to analyze and shuffle program control flow to obfuscate it. No impact on correctness of resulting program executions.
